## Page 2 of 2 Approved For Release 2002/08/21 : CIA-RDP89B00980R090200170034-8

## NATURE OF PROPOSAL:

1.	Fab one	ricate and install three pairs of System X Aircraft as follows:	WII antenna for	
	a.	One pair, sleeve dipole extend the fuselage approximately 4 ft. at Stati	ling on either side of	25X
	ъ.	One pair, log periodic dipole installed in "a" above approximately 1.5	cxtending from antennas ft.	25X
,	c.	One pair, log periodic dipol of vertical fin, extending approximately		25X <sup>2</sup>
2.	Str	uctural modification to the aircraft will	be required as follows:	
	a.	Structure between functinge stations 572 a for the machined mounts required.	md 579 will be reinforced	÷
•	ъ.	between fin station 03 and 09 for install	The state of the s	
		the antenna will be attached.		
		initum of 6 flights will be required to de tional testing of the antennas is not a pa		•
NOTE:	Func	inimum of 6 flights will be required to de		•
NOTE: Estimat	Func ted C Fab: Des	initum of 6 flights will be required to de		• 25X
NOTE:  Estimat	Func Fab Dos Fli	inimum of 6 flights will be required to de tional testing of the antennas is not a paost for Kits or Parts (SP-1023) ricate, Assemble and Install ign and Liaison		÷ .

- NOTE: 1. This does not include installation of System MVII Factore or electrical interference surveys. This ECP is for Aerodynamic evaluation only.
  - 2. A portion of the above work was accomplished in FY '63 per ECP-130 System X antenna installation.
